|-----------------|----|---------------------------|------------|------|-----|
| Briefing | 08 | Monday 2007-08-20 morning | QNH | 1006 | hPa |
|-----------------|----|---------------------------|------------|------|-----|

| Weather Situation | |
|--|--|
|  | <p>A "complicated" low pressure system has taken over control of weather in middle Europe.</p> <p>Whereas cold air flow has reached Benelux and France, lifting processes due to upper trough influences eastern part of Germany with thunderstorms.</p> <p>Competition area is situated between these ugly phenomena in an intermediate south westerly air flow with light subsidence and is likely prevented from showers or even thunderstorms.</p> |
